DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-8 and 10-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Sekine (US 5,719,967).

Sekine teaches an image processing apparatus cable of generating multivalue image data to be reproduced as a hard copy having visual quality wherein all of the claimed circuitry of claims 1, 3-8 and 10-15 is either explicitly or inherently taught as is evidenced by the fact that the image processing apparatus separates a first character/line drawing data from an input multivalue image data to be subjected to an image data processing and then synthesized with a pattern data to generate an output multivalue image data, so as to provide the hard copy having high visual quality. Therefor it is possible to prepare digital prints and print them by a digital printer

according to the data including the digital character information and the digital image information (please note col 3, line 46 – col 4, line 30; col 5, line 29 – col 8, line 34).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sekine (US 5,719,967) in view of Bosschaerts et al. (Bosschaerts) (US 5,783,356).

With regard to claims 2 and 9, Sekine does specifically teach in the step of producing prints, said images are formed on silver-halide photosensitive materials.

Bosschaerts discloses an image print system that includes in the step of producing prints, said images are formed on silver-halide photosensitive materials (col 15, lines 27-31).

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Sekine to include in the step of producing prints, said images are formed on silver-halide photosensitive materials as taught by Bosschaerts. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Sekine by the teaching of Bosschaerts to provide improved halftone images on film as taught by Bosschaerts in col 15, lines 27-31.
